

**Fixed bollards refer to bollards that are installed and cannot be moved.**

Their main function is to protect buildings or pedestrians and play an isolation role. In some pedestrian streets, fixed bollards are usually used to isolate the sidewalk from the main road to protect pedestrians.

**Material:**

Stainless steel Grade 304.

**Caution Sign:**

Diamond class 3M reflective tape.

**Diameter:**

219mm.

**Height Above Ground:**

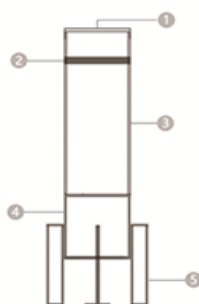

600mm.

**Below Ground**

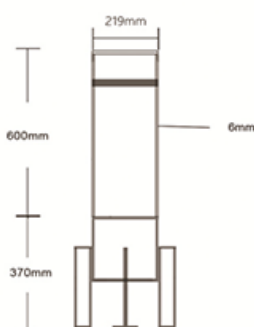

380mm.

**Thickness:**

4mm
